

Bosik Technologies Limited has developed a Range Target to be used inside institutions and outside in practice ranges. The targets are designed to prevent penetration and ricochet and increase life expectancy.

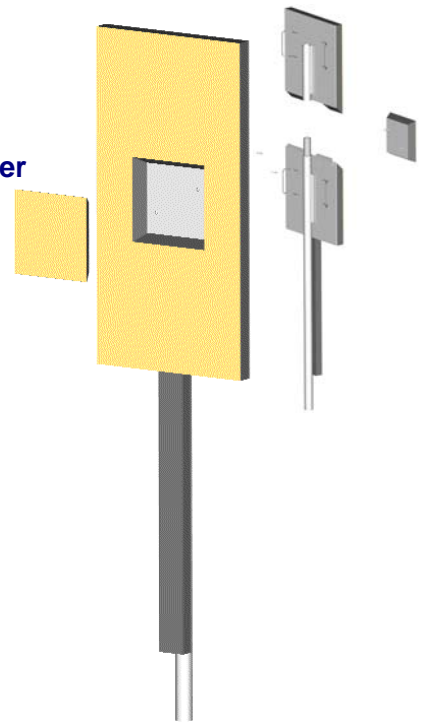

Ballistic Range Target

Range Target Features:

- Indoor or outdoor use, non-ricocheting
- Bullet trapping and lead absorbing
- Integral stand and lifting handles
- Replaceable high impact mid-section
- Modular and light weight
- Accommodates large number of rounds
- Floor or In ground custom mounting brackets
- Environmentally friendly (green)
- Cost effective (savings)

**US Patent Number
7,475,880 B2**

New innovation and environmentally friendly design, the range target is capable of entrapping over 2000 rounds of bullets. The patented centre cut-out region with beveled edges is a replaceable section in the high impact area.

The entrapped bullets are disposed with the replaceable section when filled. This prevents environmental pollution. Available to suit small caliber hand guns and up to .30 caliber rifle, ballistic rated up to NIJ Level IV.

For more information on the Range Targets, please contact Tony Bosik, P.Eng., M.Eng., President.
