

Bosik Technologies' Warning Shot Target (**WST**) has been used inside correctional institutions across Canada. The targets are designed to prevent penetration and ricochet and increase life expectancy.

Warning Shot Target

The Warning Shot Target has the following features:

- Prevent penetration and ricochet of the selected weapons
- Fire retardant and lead absorbing
- Low cost and light weight

- Absorbs multiple shots
- Wall or ceiling mountable
- Secured fastening or welded nuts to prevent removal
- Steel angle border to prevent the bullet from escaping the target when shot at an angle

For more information on the Warning Shot Targets, please contact Tony Bosik, M.Eng., P.Eng., President.
